

"You're not sick; you're thirsty. Don't treat thirst with medication."

~Dr. F. Batmangheli

Life was born in water and living organisms are largely dependent on it for their existence. Humans are not exclusions. More than 70% of adult body consists of water.

Water is a free investment in your long term health.

- Carries nutrients and oxygen to cells

- Absorbs and flushes out cell metabolic wastes
- Protects body organs and tissues
- Helps prevent constipation
- Helps dissolve minerals and acids
- Lubricates joints
- Regulates body temperature
- Moistens tissues for mouth, eyes and nose
- Lungs that provide oxygen for the body are 90% water.

If you are committed to a healthy lifestyle, make drinking enough natural water a habit in your life. It won't take long for you to feel the benefit.
