

*Prof. Kuninaka Hironaga, Head of Kuninaka-Hospital, Japan*

"Mr. Yamada, the head of Police Research Institute, suffered from severe allergy. He was treated repeatedly by skin specialist, but with no success. Then he started consuming ionized water. The allergy responded very well and was soon completely cured. No relapse had occurred, although he had taken all kinds of food. He was most grateful and excited about this treatment. As for myself, I had also suffered severe allergy. Ever since I began to consume ionized water, the allergy has recovered. Since then, I started a research on the effectiveness of ionized water. I discovered that most allergies is due to acidification of body condition and is also related to consuming too much meat and sugar. In every allergy case, the patient's antioxidant minerals are excessively low which in turn lower the body resistance significantly.

The body becomes overly sensitive and develops allergy easily. To stabilize the sensitivity calcium solution is injected into the vein. Therefore, it is clear that the ionized water has ionic calcium, which can help alleviate allergy. The ionic calcium not only enhances the heart, urination, and neutralization of toxins but controls acidity. It also enhances the digestive system and liver function. This will promote natural healing power and hence increase its resistance to allergy. In some special cases of illness, which do not respond to drugs, it is found to respond well to ionized water."
