

Acidic Water helps to restore the delicate pH balance of skin and helps to eliminated harmful bacteria. Alkaline Water is reducing free radicals, supplying extra oxygen, improving mineral uptake and enhancing cell hydration.

For facial treatments use first Acidic Water then use Alkaline Water when preparing face mask.Use strong Acidic Water for pedicure and manicure to kill fungus and bacteria on skin. Also use it to disinfect instruments and equipment.

Also strong Alkaline Water (pH higher then 11.5) can act as a detergent to wash towels and clothes.
