Touch-type automatic water supply structure and seven-color back lights

One touch of a button enables to start and stop water supply without any other operations, and divides and displays alkaline water and acidic water by seven colors. Users can more easily use the UCE-9000 Turbo Water Ionizer since it is coated by touch panels and its functional selection is displayed by icons.

Voice guided service

Warning voices enable to more safely and conveniently use the product for the explanation and safety of various functions. Safety examinations are conducted according to the setup conditions after the installation of the UCE-9000 Turbo Water Ionizer, and voice guides are done in case of impropriety.

Anti-leakage system of the electrolytic tank. Any water leakage immediately shuts down the operation of the electrolytic tank.

9

Electrode plate made of precious metal, platinum and high purity titanium.

Drive system with high efficiency. The system is composed of a high efficiency motor, a high efficiency pump, and a high efficiency fan.

Two-stage filtration system. The first stage is a 5-micron sediment filter, and the second stage is a 0.1-micron ultra-fine filter, which can remove all the impurities in the water.
